PHYSICS LETTERS B

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/INSPEC/Physics Briefs

Volume 367, numbers 1,2,3,4 **18 January 1996**

Contents

Instructions to authors v

Nuclei

A representation to describe nuclear processes in the continuum
R.J. Liotta, E. Maglione, N. Sandulescu and T. Vertse 1

Charge symmetry breaking in nuclear matter
M. Kimura, A. Suzuki and H. Tezuka 5

Cranked relativistic mean field description of superdeformed bands in ^{83}Sr
A.V. Afanasjev, J. König and P. Ring 11

Complete $0\hbar\omega$ shell model Monte Carlo calculations of ^{94}Ru, ^{96}Pd, ^{96,98}Cd and ^{100}Sn
D.J. Dean, S.E. Koonin, T.T.S. Kuo, K. Langanke and P.B. Radha 17

The weak parity-violating pion–nucleon coupling
E.M. Henley, W-Y.P. Hwang and L.S. Kisslinger 21

The chiral phase transition in a random matrix model with molecular correlations
T. Wettig, A. Schäfer and H.A. Weidenmüller 28

A consistent study of the the low energy baryon spectrum and the nucleon-nucleon interaction within the chiral quark model
A. Valcarce, P. González, F. Fernández and V. Vento 35

The chiral condensate in nuclear matter
R. Brockmann and W. Weise 40

Mesonic width effects on the momentum dependence of the ρ–ω mixing matrix element
M.J. Iqbal, X. Jin and D.B. Leinweber 45

Excess dileptons in high-energy nucleus-nucleus collisions
C.-Y. Wong and Z.-Q. Wang 50

Off-shell effects in heavy particle production
G.F. Bertsch and P. Danielewicz 55

Measurement of the vector and tensor analyzing powers for the *d-p* elastic scattering at E_d = 270 MeV
N. Sakamoto et al. 60

Observation of the ^{11}Li(βd) decay
I. Mukha et al. and ISOLDE Collaboration 65

Particles and fields

Spinning charged BTZ black holes and self-dual particle-like solutions
G. Clément 70

"Faster than light" photons and rotating black holes
R.D. Daniels and G.M. Shore 75

On $SO(32)$ heterotic – type I superstring duality in ten dimensions
A.A. Tseytlin 84

Integrable structures in supersymmetric gauge and string theory
E.J. Martinec 91

The power of M theory
J.H. Schwarz 97

On-mass-shell gaugino condensation in Z_N orbifold compactifications
I. Gaida and D. Lüst 104

Generalized KdV and quantum inverse scattering description of conformal minimal models
D. Fioravanti, F. Ravanini and M. Stanishkov 113

A note on the deformed Virasoro algebra
S. Lukyanov 121

How to reach the correct $\sin^2\theta_W$ and α_s in string theory
H.P. Nilles and S. Stieberger 126

A family of dual $N = 2$ supergravity actions in ten dimensions
A.H. Chamseddine 134

Conserved currents for unconventional supersymmetric couplings of self-dual gauge fields
Ch. Devchand and V. Ogievetsky 140

(Continued inside)

0370-2693(19960118)367:1-4;1-E

PHYSICS LETTERS B

Volume 367, numbers 1,2,3,4 **18 January 1996**

Contents

(Continued from page 4 of cover)

On the relation between the holomorphic prepotential and the quantum moduli in SUSY gauge theories
J. Sonnenschein, S. Theisen and S. Yankielowicz 145

Duality in SUSY $SU(N)$ with an antisymmetric tensor
P. Pouliot 151

The mass spectrum in a model with calculable dynamical supersymmetry breaking
T.A. ter Veldhuis 157

On the gauge-fixed BRST cohomology
M. Henneaux 163

Non-abelian "self-dual" gauge theory in 2 + 1 dimensions
P.J. Arias, L. Leal and A. Restuccia 170

On the renormalizability and unitarity of the Curci–Ferrari model for massive vector bosons
J. de Boer, K. Skenderis, P. van Nieuwenhuizen and A. Waldron 175

New constraints on superpartner masses
T. Falk, K.A. Olive, L. Roszkowski and M. Srednicki 183

Detecting a light stop from top decays at the Tevatron
S. Mrenna and C.-P. Yuan 188

Topologically massive gauge theory with $O(2)$ symmetry
I.I. Kogan and K.-M. Lee 195

Casimir effect and renormalization group
I. Brevik, L.N. Granda and S.D. Odintsov 206

Dimensional reduction in Nambu–Jona-Lasinio model in external chromomagnetic field
I.A. Shovkovy and V.M. Turkowski 213

Just-so oscillation: as just as MSW?
Z.G. Berezhiani and A. Rossi 219

Gauged R-symmetry, fermion and Higgs mass problem
E.J. Chun 226

On the light cone singularity of the thermal effective expansion
T. Grandou 229

On the calculation of the vacuum energy density in sigma models
V.G. Ksenzov 237

The shape of the renormalized trajectory in the two-dimensional $O(N)$ non-linear sigma model
W. Bock and J. Kuti 242

Mode dependent field renormalization and triviality
R. Tarrach 249

SO(3) vortices and disorder in the 2d SU(2) chiral model
T.G. Kovács and E.T. Tomboulis 254

Interacting rigid strings with long range order: beyond the Gaussian approximation
M. Awada and D. Zoller 259

String junction as a baryonic constituent
Yu.S. Kalashnikova and A.V. Nefediev 265

Asymptotic freedom in a string model of high temperature QCD
M. Awada 270

The mass of the η' in self-dual QCD
M. Hutter 275

Light meson decay constants beyond the quenched approximation
G.M. de Divitiis, R. Frezzotti, M. Guagnelli, M. Masetti and R. Petronzio 279

(Continued on preceding page)

PHYSICS LETTERS B

Volume 367, numbers 1,2,3,4 **18 January 1996**

Contents

(Continued from following page)

Controlling a non-polynomial reduced finite temperature action in the U(1) Higgs model
A. Jakovác, A. Patkós and P. Petreczky 283

Charge condensation in QED_3 with a Chern-Simons term
T. Itoh and T. Sato 290

A new probe of lepton flavour violation
K.J. Abraham and B. Lampe 299

Modelling form factors in HQET
S. Veseli and M.G. Olsson 302

Radiative rare B decays revisited
S. Veseli and M.G. Olsson 309

Second quantization approach to composite hadron interactions in quark models
D. Hadjimichef, G. Krein, S. Szpigel and J.S. da Veiga 317

The strangeness radius and magnetic moment of the nucleon revisited
H.-W. Hammer, U.-G. Meißner and D. Drechsel 323

Scaling variable for nuclear shadowing in deep-inelastic scattering
B. Kopeliovich and B. Povh 329

The final state hadrons in polarized deep inelastic scattering
S.D. Bass 335

Optimized perturbation theory for bound states: toy model and realistic problem
A.A. Penin and A.A. Pivovarov 342

Perturbative QCD estimation of the $B \to K^* + \gamma$ branching ratio
M.-A. Dariescu and C. Dariescu 349

Ratios of B and D meson decay constants in an improved mock meson model
D.S. Hwang and G.-H. Kim 353

Amplitude relations for B decays involving η and η'
A.S. Dighe, M. Gronau and J.L. Rosner 357

Long distance contributions to penguin processes $b \to s\gamma$ and $b \to d\gamma$
N.G. Deshpande, X.-G. He and J. Trampetic 362

Recombination methods for jets in $p\bar{p}$ collisions
E.W.N. Glover and D.A. Kosower 369

Application of the pinch technique to neutral current amplitudes and the concept of the Z mass
K. Philippides and A. Sirlin 377

Jettiness can be a signature of phase transition in multifractal formalism
S.K. Nayak and Y.P. Viyogi 386

Erratum

Exclusive semileptonic decays of B mesons into light mesons in the relativistic quark model [Phys. Lett. B 356 (1995) 516]
R.N. Faustov, V.O. Galkin and A.Y. Mishurov 391

Cumulative author index to volumes 361–367 392
